

EZ-Groomer - The Superior Grooming Tool Your Pets will Love!

The EZ-GROOMER pet grooming comb uses a new tooth design which gathers undercoat fur in a much more efficient manner than conventional grooming tools.

This comb removes more loose hair than you may be accustomed to. Groom in an appropriate area of your home or yard.

This comb retains undercoat fur more effectively if the pet has a damp coat ~ consider grooming your pet after a bath.

One of the best attributes of this grooming tool is its ability to comb in all directions. Backcombing can be especially effective on many kinds of pets.

The rounded bottom of the tooth should touch the skin in a massaging action. Keep the tips up and the handle parallel to the animal's coat.

"While it looks wicked the EZ-Groomer works well and pets love it!" - Amy Shojai, Certified Animal Behavior Consultant and author of Twenty-three cat and dog care books.

The **7-tooth grooming comb** works very well on short and long-haired cats, and dogs with short to medium-length coats such as: German Shepherd, Terrier, Spaniels, Pekinese, Corgis, Poodles, Shelties, Pomeranians, Setters, Rottweilers

The **5-tooth grooming comb** works well on densely-furred dogs such as: English Sheepdog, Samoyed, Great Pyrenees, Newfoundlanders, Norwegian Elkhounds, Huskies

20 Combs @ \$6.00 ea + S/H = \$134.00

10 Combs @ \$7.00 ea + S/H = \$78.00

These combs will be unpackaged
